## Junior Web Developer

Passionate full stack web developer with a strong focus on design and a knack for problem-solving. Seeking to join a team that values continuous learning, fosters professional growth, and embraces diverse perspectives. Dedicated to contributing technical knowledge and design concepts to create functional but impactful projects that resonate with a global audience. Remote work preferred.

## RECENT PROJECTS (MORE ON GITHUB)

MOONSWELL | HACKATHON

[Deployed Site](#)

*Moonswell is a React SPA (single-page application) made as part of a collaborative hackathon. Allows users to input a location and generate relevant live data using API calls.*

- Data retrieval and output formatting from various public APIs including 2 dynamic news tiles;
- Features an interactive geolocation search bar & custom web scraper API built in express;
- Netlify functions for API key security;
- Git collaboration with feature branching style.
- **Stack:** React, JavaScript, Tailwind CSS, React Context API, React Router, React Fetch API and Axios

FITNESSFINDER API

[Github Repo](#)

*FitnessFinder API is a web server API. Allows owners to log their facility info and general public to retrieve relevant gym data.*

- All HTTP request methods;
- Both public and secure (via JWT and verification), complex, and dynamic endpoints;
- MVC architecture and synthesis via Marshmallow/Flask-SQLAlchemy ORM;
- 3NF database normalization of psql rdbsms.
- **Stack:** Python, Flask, SQLAlchemy ORM, Marshmallow, PostgreSQL, Insomnia (testing)

VIPER | TERMINAL APP

[Github Repo](#)

*Viper is a language learning terminal application which allows users to interact with the app based on user-populated CSV files.*

- Features three modes: translation, learning, and quiz mode and a continuous main menu with "exit anytime" capability;
- Various points for user input with robust error handling and input sanitization;
- Includes a concurrent timer;
- Source file pathing and readability for CSVs;
- Bash scripting for single CLI command.
- **Stack:** Python, Googletrans, CSV

## RECENT EMPLOYMENT

### LUXURY PROPERTY MANAGER · YOUR LUXURY ESCAPE

BYRON BAY AUS

SUMMER 2021/2022

***Your Luxury Escape** is a specialised accommodation agency based in the heart of Byron Bay.*

- Oversaw and managed 25% of a carefully curated portfolio of luxury properties on a daily basis, eventuating to 50% of all properties;
- Fielded reservation enquiries from guests via email and phone; maintained a 6-star level of service throughout all correspondence; contacted guests regarding outstanding balances, often between \$30-\$50k due;
- Liaised with 4 different cleaning teams, numerous maintenance teams, and hundreds of guests to arrange a seamless calendar for each property;
- Regulated monthly booking platform scans to catch discrepancies in property descriptions, pricing, double-bookings, etc. and collaborated with the booking systems' managers (e.g. bookings.com, airbnb, stayz.com) to rectify any found errors.

### MANAGER + EXEC. ASSISTANT TO OWNER · IN THE BAY SERVICES

BYRON BAY AUS

WINTER 2020/2021

***In The Bay Services** is a family owned and operated [cleaning] business that cares about you. We operate in beautiful Byron Bay.*

- Restructured training program + employee pay packets to increase profits to be further reinvested into the business; generated approx. an additional \$35k annually;
- Designed, created and edited copy for marketing collateral (print and digital); created on-boarding packets, and staff compendiums to be used internally and externally for owner's reference;
- Managed and organised high-volume company email inbox, weekly staff rostering, and scheduling for clients; also managed and curated company social media;
- Conducted and generated leads for new business acquisition onsite; personally contributed 5 new major clients to the business increasing annual revenue by 15%;
- Guaranteed expected standards were met at time of arrival of guest; heavily focused on minute details that may have been overlooked.
